

Nursery school

Since 2018 we are teaching and taking care about the children from the earliest childhood. Our program education starts with 3 years old children until 6 years when they start going to the Primary School. St. Ponsiano Ngondwe Nursery school is in a secure, suitable and stimulating environment that contributes to supporting children's developmental needs.

We have three classes according to their ages and needs:

- Baby Class.
- Middle Class.
- top Class.

Most of the program has been developing in English, so the children start being familiar with the language since the beginning of our educational program. Also, they have time for playing on their playground designed especially for them. We offer them a breakfast that enables the child to remain in school active. We stress the total development of each child; socially, spiritually, morally, intellectual, emotionally and physically. The curriculum ensures holistic development.

Our Nursery School classrooms are designed to help your child make significant developmental gains, communicate more successfully, and work well both independently and in group situations. Building on Preschool learning, Nursery learning focuses on problem-solving, responsive listening and language usage, as well as social and collaborative skills, with specific lessons in Reading, Writing, Math etc. It incorporates activities like games, sports, art and craft, music, tour and assemblies.
